TIMBER VOLUMES:

	<u>Volume</u>	<u>Log Rule</u>	<u>Form Class</u>
Pine Sawtimber	225.3 MBF	Scribner	78
Poplar Sawtimber	38.5 MBF	Doyle	76
Sweetgum Sawtimber	19.0 MBF	Doyle	76
White Oak Sawtimber	9.4 MBF	Doyle	76
Red Oak Sawtimber	34.0 MBF	Doyle	76
Misc. Hard Sawtimber	11.2 MBF	Doyle	76
Pine Chip-N-Saw	86.3 Tons		
Pine Fiber	249.8 Tons		
Hardwood Fiber	1,392.7 Tons		

LOCATION: This timber is located 2.2 miles south of Knightdale in Wake County, North Carolina. Access to VIEW the timber is via Plum Blossom Drive through the Cottonwood Subdivision and then a dirt path toward the waste water treatment facility. The LOGGING access will be a farm path directly from Bethlehem Road, 200 feet south of Old Ferrell. The path will need to bypass a small section of asphalt near the road before merging with the farm path and continuing through the cultivated field to the trees. Look for the pink flagging and/or timber sale signs along the road. (See enclosed location map.)

PLACE OF SALE: The opening of bids will take place near the Cottonwood Subdivision entrance as indicated on the timber sale map. (See timber sale map.)

PROPERTY LINES: All property lines are marked with pink flagging. A boundary survey was completed in 1985 by Williams, Pearce & Associates of Zebulon. The map is recorded in Map Book 1985, page 569 at the Wake County Register of Deeds. Numerous partial surveys and subdivisions have been recorded subsequently.

A stream-side management zones (SMZ) has been marked on the ground with orange flagging clearly marked with the words "Streamside Management Zone". Selected trees as marked with a large orange circle may be harvested from within the streamside management zone.

DESCRIPTION OF TIMBER: Offered for sale is an old growth stand of quality pine and mixed hardwood with a small area of old field pine for a total of 30.34 acres. The majority of this timber, totaling 26.11 acres, will be clear-cut of all merchantable timber. The stream-side management zone will add an additional 4.24 acres. Within the SMZ's only the trees marked with an Orange "O" will be selectively harvested.

Within the primary harvest clear-cut area (Stand 1), pine sawtimber averages 9,584 board feet per acre and 416 boardfeet per tree. Hardwood sawtimber including poplar, red oak, sweetgum and white oak will total an additional 4,568 board feet per acre. There is only a small amount of pine Chip-N-Saw on the property totaling 86 tons, pine fiber, totaling 236 tons and hardwood fiber totaling 303 tons; all excluding topwood.

The streamside management zones (Stand 4) will be selectively harvested. Within this area, only the trees marked with an Orange "O" are to be harvested.

METHOD OF DETERMINING TIMBER VOLUME: The primary sale area was inventoried using the line plot method. Cruise lines were spaced two chains apart. One-tenth acre circular plots were established along the cruise lines at two chain intervals and timber within each plot tallied, resulting in an 19.53% inventory. The streamside management zones received a 100% inventory.

All merchantable pine timber was divided into one of three product groups. Pine saw timber was measured from a 14 inch DBH to an 8 inch or merchantable top. Pine Chip-N-Saw was measured between an 8 and 12 inch DBH to a 4 inch or merchantable top. Pine fiber was measured from a 6 inch DBH to a 4 inch top. All three product groups had a minimum height of one 16 foot log after which heights were measured using one half log increments.

All merchantable hardwood timber was divided into one of two product groups. Hardwood saw timber was measured from a 12 inch DBH to an 8 inch or merchantable top. Hardwood fiber was measured from an 8 inch DBH to a 4 inch top. Both product groups had a minimum height of one 16 foot log after which heights were measured using one half log increments.

Maps of the subject area and resulting acreage determinations were produced using ArcView geographical information system and Trimble Pathfinder Pro XR global positioning system software and information from deeds, plats and aerial photographs.

SALE INFORMATION ONLINE: Complete information for all current timber sales is now available online at <http://www.rawlingsforestry.com/timbersales/>. Online information includes the bid invitation, sale map, and additional inventory information, as applicable. Prospective bidders wishing to register to receive automatic email notification of future timber sales may do so at <http://www.rawlingsforestry.com/timbersales/emailnotices.html> or like us on Facebook.

THE SALE: This timber will be sold on a sealed bid, lump sum basis. Sealed bids will be accepted in our office, by US mail, FAX, FedEx or UPS until 9:00 A.M. and accepted by email and phone until **11:00 A.M., Thursday October 18, 2018**, or bids may be brought in person to the place of sale. Please note, phone coverage varies by location and it is the buyer's responsibility to insure adequate coverage before attempting to submit bids at the last moment. Phone and email bidders are encouraged to submit their bids before 10:30 A.M. after which time I will be on the property and may not have adequate phone coverage. At **11:00 A.M.**, all bids in hand will be opened. The highest bidder will be the successful bidder, provided his bid is above the undisclosed minimum. The seller reserves the right to refuse any and all bids. A deposit of ten percent of the bid price is to be delivered to Rawlings Consulting Forestry, PLLC within 72 hours of the bid opening. Upon receipt of the timber deed, the balance of the sale price will become due. Any questions concerning the sale should be directed to Brad Rawlings in Wendell, North Carolina at (919) 365-5451 or via e-mail at brad@rawlingsforestry.com.

CONDITIONS OF SALE:

1. The buyer will have 24 months from the date of the timber deed to cut and remove this timber.
2. All roads and paths are to be left in at least as good a condition as that in which they were found.
3. All sewer easements must be crossed with bridge mats.
4. The relationship between buyers and loggers must be in the form of a written contract. At a minimum, such contract must clearly state the adherence to the applicable River Rules, Best Management Practices, the endangered species act, and the "Conditions of Sale" as stated in this bid invitation. Rawlings Consulting Forestry, PLLC must approve the location of each crossing.
5. The buyer will be required to provide evidence of liability insurance of the buyer and the logging contractor in an amount suitable to the owners, showing the owners as additional insured, to protect owners from any and all claims for injury to persons or damage to property relating to any manner to the harvest.
6. Rawlings Consulting Forestry, PLLC must be notified at least 24 hours in advance, and not more than 72 hours in advance, of the initiation of logging operations. Failure to do so may result in an automatic partial or whole forfeiture of the performance bond.
7. All decking, skidding, and loading are to be done within the designated Sale Area (See timber sale map).
8. Within the timber sale area, all unmerchantable timber, tops and/or branches will be cut or caused to be laid on the ground. Large dead snags will be exempt. No trees, limbs, brush, or other logging debris shall be left in or across the boundary lines, roads, fields, fences, drainage channels, creeks, or ponds. All stumps will have a maximum height of 11.5 inches.
9. From within the streamside management zones (SMZ) and the select harvest area, only the trees marked with an Orange "O" are to be harvested
10. It will be the responsibility of the buyer to meet the performance standards in the Forest Practices Guidelines Related to Water Quality (15NCAC 1J .0201 - .0209), Nutrient Sensitive Water Management Strategy as related to the applicable river rules and Forestry Best Management Practices as described in a manual available from the North Carolina Division of Forest Resources. Any Riparian Buffer Zones or Streamside Management Zones marked by Rawlings Consulting Forestry, PLLC will be considered a minimum requirement and it will be the responsibility of the grantee to ensure correctness and to provide additional width or area as needed.
11. In the event that adverse weather conditions and/or excessive soil moisture make logging operations detrimental to the well-being of the land, Rawlings Consulting Forestry, PLLC reserves the right to halt any and all logging operations. If logging operations are halted by Rawlings Consulting Forestry, the cutting time limit will be extended proportionally when weather conditions and soil moisture are conducive to continued logging.
12. The buyer will not sell or assign any rights to any other person or entity to cut, saw, or remove any of the timber conveyed herein as firewood.
13. No boundary line trees are to be cut or unnecessarily damaged. Boundary line trees which are cut will be scaled according to International 1/4" Log Rule, Form Class 80 and paid for at the rate of \$800 per MBF.
14. The buyer will be required to post a \$4,000.00 performance bond with the owner's agent, Rawlings Consulting Forestry, PLLC, at the time of closing. The bond shall be forfeitable in part or in whole upon the basis of a final inspection by Rawlings Consulting Forestry, PLLC as to damage, if any, to be charged against said bond. Moreover, it is expressly stated that such bond is not intended to be agreed liquidated damages and is not intended to limit what Rawlings Consulting Forestry, PLLC considers to be the maximum damage that could be incurred or inflicted.
